BC-89
Battery Terminal
Cleaner & Protector

REMOVES CORROSION FROM TERMINALS & CABLES
CLEANS AND NEUTRALIZES BATTERY ACID
CONTAINS COLOR INDICATOR TO DETECT LEAKS
USE ON: LIFT TRUCKS, GOLF CARTS, CARS, TRUCKS,
FORK LIFTS, SERVICE VEHICLES, ETC.

Product # 1011
For Professional Use Only

BC-89 is designed to clean and protect batteries. A color indicator is included to assist in detecting leaks. Battery Terminal Cleaner eliminates corrosion buildup and provides a residual corrosion preventive coating. **BC-89** is ideally suited to use on batteries in fleet cars, trucks, busses, golf carts, fork lifts, construction and agricultural equipment. **BC-89** is a yellow foam that turns red in the presence of battery acid. **BC-89** cleans, neutralizes and protects to help insure long battery life.

DIRECTIONS FOR USE:

Shake well before use. Spray liberally over entire battery including cables, clamps and brackets. Be sure cell covers are tightly closed before spraying. Yellow foam will turn red in the presence of acid and will neutralize any acid on battery. After a few minutes, flush off with water or damp cloth. Use additional applications to aid in leak detection. For best results follow with **AIS's BTS-90 Battery Terminal Sealer**.

Additional Information

Batteries play an important role in virtually every type of industry. All vehicles and most heavy equipment rely on battery power to get them going each day. In most cases the bigger the machine, the bigger and more expensive the battery. Battery packs for lifts and trucks can be in the thousands of dollars to replace should they fail, not to mention the cost of down time. Battery maintenance is important and should be included in a preventive maintenance program to insure the reliability of your equipment. Remove dirt and corrosion easily with **BC-89** Battery Terminal Cleaner. **BC-89** will also neutralize acid and detect any leaks. The thick yellow foam turns red in the presence of any acid making leak detection a breeze. After cleaning and leak detection apply a coat of **AIS's BTS-90 Battery Terminal Sealer**. This clear sealer can be applied to battery terminals, clamps, brackets, cables and compartments to prevent corrosion and oxidation.

CONSULT LABEL AND MSDS BEFORE USING.
