## Additional Information

In today's business environment, computers and electronic equipment are everywhere. Computerized devices seem to be doing many things these days such as operating heavy machinery in factories, processing and storing important information, connecting telephone calls, identifying people and products, maintaining security systems, etc., the list is endless. Computers and electronic devices may be fast but they are also vulnerable to the effects of static electricity. Static charges can wipe out data, crash systems and cause irreparable damage to any type of electronic equipment not to mention the discomfort static electricity causes the people working in the affected areas. **NO-STAT** Anti-Static Spray is the best solution to this problem. This remarkable product is fast and easy to use, simply spray or wipe onto areas where static electricity is a problem. Carpets and upholstery are the main source of static electricity and **NO-STAT** is ideal for treating these areas. **NO-STAT** is quick drying and non-staining and safe on all carpet and upholstery fabrics. Popular uses for **NO-STAT** include retail stores, casinos, theaters, graphic arts and printing firms, restaurants and hospitals. **NO-STAT** is especially valuable in reducing explosion hazards caused by static electricity. Contact your local AIS representative for a demonstration of **NO-STAT**.
