

ZINC KOTE provides a zinc film on metal surfaces that seals out moisture and prevents corrosion by sacrificial galvanic action. It is highly resistant to water, acid and salt atmospheres.

MEETS FOLLOWING SPECIFICATIONS:

- MIL-P-46105 Weld Through Primer.
- U.S. Navy Galvanizing Repair Specifications. MIL-P-21035
- U.S. Air Force MIL-P-26915A for steel.
- U.S. Air Force MIL-T-26433 for towers. (Temperate and Arctic Zones)

TYPICAL USES:

Structural steel and wire, tanks and piping, fans, ducts and culverts, air conditioning units, farm and road equipment, dairy equipment, signs and fencing and oil rigs.

DIRECTIONS FOR USE:

1. Shake can until ball moves freely. Shake frequently during use.
2. Make sure surface is clean from all loose rust, oil, grease and old paint.
3. Spray from 10 to 12 inches in a sweeping motion. Spray thin coat and allow to dry then apply second coat for longer protection. Allow approximately 6 hours to cure before painting surface.

INGREDIENTS	CAS NUMBER
TOLUENE	108-88-3
COPOLYMER RESIN	N/A
ZINC	7440-66-6
HYDROCARBON PROPELLANT	68476-86-8

Additional Information

ZINC KOTE Cold Galvanizing Spray provides maximum weather protection for all metal surfaces. This unique formula is resistant to the most severe weather conditions; hot, cold, wet, salt and acidic environments. The quality and durability of this product are unmatched with any other type of paint or coating and because of this fact **ZINC KOTE** meets many military specifications. **ZINC KOTE** has an attractive appearance or can be painted over and will keep rust from coming through the exterior paint from the inside, in fact, one of the MIL specs mentioned above is for metal primers. Use **ZINC KOTE** anywhere corrosion is a problem or where other coatings have failed to do the job. Used to protect a wide variety of metals, **ZINC KOTE** can provide protection for several years with one application. For a demonstration contact your local **ais** representative.
