| LINE-ALL WHITE            | #1080W  |
| LINE-ALL YELLOW           | #1080Y  |

**LINE-ALL AEROSOL Traffic Marking Paint**

**LINE-ALL-A** Traffic Marking paint is a heavy duty, water base formula designed for traffic areas such as parking lots, roadways, curbs, playgrounds, playing fields, construction sites, factory production areas, etc. Compatible with most striping machines, crisp lines up to 4" wide can be made on most concrete, blacktop and other surfaces.

**DIRECTIONS FOR USE:**

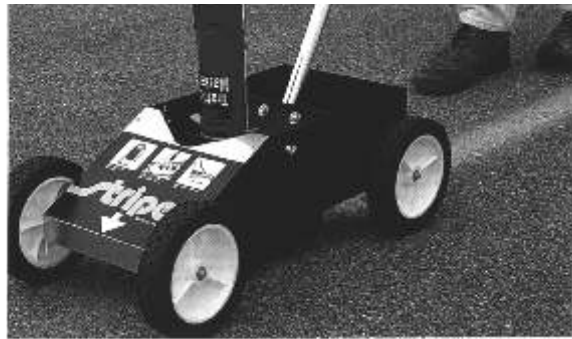

- For best results, use when can is between 40° and 90° F. (4° - 32° C.).
- Shake can vigorously for at least one minute before and occasionally during use.
- Turn can upside down and place into can holder of Marking Machine. **MAKE SURE THAT SPRAY HEAD FITS PROPERLY INTO HOLE.** Long side of spray head must be parallel to the axle.
- A line approximately **TWO INCHES WIDE** will be applied and variable widths will result when can is positioned between highest and lowest points.
- Squeeze trigger to activate spray. To avoid any possible "build up" of paint when starting, it is suggested that machine be in motion and trigger activated when passing over starting point.
- Should spray pattern become restricted after using, remove spray head from can and clean orifice in spray head. Do not stick objects into can opening.
- After use: hold can upright pointed away from self, and press spray head briefly to clear it.

| AEROSOL INGREDIENTS | CAS#      |
|---------------------|-----------|
| Toluol              | 108-88-3  |
| Acetone             | 67-64-1   |
