

D-TARN

Metal & Multi-Surface Creme Cleaner & Polish

**REMOVES: DULLNESS • TARNISH
RUST • OXIDATION
SCRATCHES • CARBON**

Product # 1091

For Professional Use Only

D-TARN is used to remove dullness, tarnish, oxidation, scratches and scuff marks. The treated surface will be left polished and with a lasting protective coating.

USE ON:

Brass, stainless steel, copper, silver, aluminum, chrome, painted surfaces, glass, Plexiglas, non-optical plastics, mirrors, Formica, porcelain, fiberglass, motorcycles, automobiles, trucks, boats, equipment and any similar type surface that needs polishing or cleaning.

DIRECTIONS FOR USE:

Shake well before using. Spray foam onto a clean cloth or paper towel and work foam into surface until dry to remove oxidation, etc. Then rub out with a soft cloth to a sparkling clean sheen. On very dull surfaces, repeat treatment until clean. For best results, do a small section at a time. Recommended for "spot" polishing and cleaning of surfaces subject to undue exposure. Leaves a tough and durable protective film.

Additional Information

D-TARN Foaming Metal Polish and Multi-Surface Cleaner is a remarkably fast and easy product to use. With many products polishing metal surfaces can be a messy and often tedious task. With **D-TARN** simply dispense some of the foam cleaner onto a soft cloth, wipe away dirt and tarnish and buff to a super high sheen. Exterior areas that are badly tarnished may require heavy scrubbing or use of stronger acidic cleaners. However, once cleaned these areas can be easily and quickly maintained with **D-TARN**. This versatile product is a unique combination of a foaming creme metal polish and a multi-surface cleaner that is usable on a wide range of surfaces. Use **D-TARN** to put the finishing touches on routine cleaning jobs in bathrooms, dining rooms, apartments, hotel rooms, office buildings, meeting rooms, museums, mortuaries, mausoleums, theaters, casinos, etc. Building owners and facility managers will notice the extra shine and lustre **D-TARN** provides and complement the maintenance staff on a job well done. **D-TARN** leaves a protective coating that slows down the oxidation process so that many of these surfaces will be easier to clean the next time around.
