PEN-TRAIT

**Penetrating Oil
with Teflon & Moly**

- EFFICIENT • ECONOMICAL • FAST ACTING
- LOOSENS NUTS, BOLTS & FITTINGS.
- DISPLACES MOISTURE
- REMOVES RUST • PRESERVES METAL
- LUBRICATES • STARTS WET ENGINES

**Product # 1093 Aerosol
Product # 5035 Bulk**

For Professional Use Only

PEN-TRAIT Penetrating Oil has excellent penetrating power for loosening frozen and rusty corroded parts. **PEN-TRAIT** quickly displaces moisture from ignition systems on autos, trucks, farm and commercial equipment. Protects against corrosion on most unpainted metal surfaces. May damage certain plastics, painted or lacquered surfaces. Provides excellent lubrication from the addition of both Teflon® and molybdenum disulfide working together to stop squeaks and binding on cams, wheels, chairs, hinges, locks, rollers, etc.

DIRECTIONS FOR USE:

For best results spray a liberal amount on frozen part and tap the joint lightly. Penetration will occur within minutes. On deep corrosion, a second application may be necessary.

Wet Engines: Remove distributor cap and using extension tube, spray entire electrical system lightly.

INGREDIENTS	CAS NUMBER
PETROLEUM DISTILLATES	64742-88-7
MINERAL OIL	64742-80-9
TOLUENE	108-88-3
METHANOL	67-56-1
9-OCTADECENOIC ACID	112-80-1
PROPANE (AEROSOL ONLY)	74-98-6
2-BUTOXYETHANOL	111-76-2

Additional Information

PEN-TRAIT Penetrating Oil is an advanced formula that combines deep penetration with long lasting lubrication. **PEN-TRAIT** is fortified with Teflon® and molybdenum disulfide, the two most advanced solid lubricants. These materials are added to a blend of petroleum oils and penetrating agents to provide fast action and excellent power to loosen rusted or corroded parts. **PEN-TRAIT** preserves metal and protects these surfaces from rust, corrosion and moisture. The Teflon® and moly added to the formula give superior lubrication that remains long after the oils evaporate. This feature makes **PEN-TRAIT** ideal for locks, hinges, rollers, tracks, cables and mechanical equipment of all kinds. **PEN-TRAIT** truly displaces moisture making it equally effective on wet surfaces and for restoring water-shorted circuits such as distributors, sprinkler valves, outdoor and marine applications. Use **PEN-TRAIT** where other "WD" type products have failed or proved to be insufficient to do the job. Contact your local **AIS** representative for information on one of the most comprehensive line of lubricants on the market today.
