

TKO

Foaming Selective Herbicide

TKO is a rare product in that it is only one of a handful of aerosol herbicides available on the market today. Using a special high intensity actuator, **TKO** easily and accurately applies a herbicide onto weeds without affecting surrounding desired plants, and because it is a selective herbicide, it only kills unwanted weeds without harming ornamental plants and grasses. **TKO** is formulated with 3 vital ingredients----MCPP; 2,4-D; and 2,4-DP non-volatile amine salts----all of which give it the power to eliminate over 140 different broad leaf weeds. One application will kill most weeds in just three to five days. Plus **TKO** sprays as a thick foam to help you track the area that you cover and thus avoid over application.

DIRECTIONS FOR USE:

Shake can just before using and occasionally during use. Stand close to weed with can aimed at weed and away from face. Push down briefly on button. Spray to cover center of weed. Do not over spray. The spray's foaming action will make it easy for you to see coverage. One application will kill most weeds listed. If certain tough weeds are not dead within 3 weeks repeat application.

Additional Information

TKO Foaming Selective Herbicide is our most powerful aerosol herbicide. This product is ready to use and is designed to be used in areas where problem weeds need to be eliminated. Weeds that are controlled by **TKO** area Alder, Aster, Biden, Bitterweed, Broomweed, Chickweed, Clover, Dandelion, Dogfennel, English Daisy, Fixweed, Ground Ivy, Hemp, Knotweed, Mallow, Morninglory, Oxalis, Poison Ivy, Poison Oak, Ragweed, Sweet Clover, Tumbleweed, and other broad leaf weeds. After applying **TKO**, many broadleaf weeds will begin to show visible signs of leaf curl within a few days. Some hard to control broadleaf weeds may require an additional treatment in 3 to 4 weeks. This product contains a foam which marks the spot where the weed killer has been applied. Contact your local **ais** representative for a demonstration.
