

IMC Ice Machine Cleaner

IMC is a specially formulated product for use in cleaning scale deposits from ice machine evaporators. Special inhibitors make **IMC** safe for use on nickel and tin plated evaporators.

DIRECTIONS FOR USE:

Drain and clean the water sump of all loose residue. Refill with clean water and add 16 ounces of **IMC** for up to 3 gallons of water. Circulate the solution for about 30 minutes. Flush thoroughly with fresh water before reuse. Remember to always wear safety goggles and rubber gloves when handling, mixing or using.

INGREDIENTS
PHOSPHORIC ACID

CAS NUMBER
7664-38-2

2	HEALTH
0	FLAMMABILITY
1	REACTIVITY
R	PROTECTION

Additional Information

IMC Ice Machine Cleaner is a very unique product designed to remove stubborn scale deposits that form on the evaporators of most ice machines. This concentrated formula dissolves the scale buildup and removes the debris that can affect the operation and the quality of the ice the machine produces. For a restaurant, hotel or motel, hospital or sports arena the ice machines are important pieces of equipment. The condition and quality of their operation is the responsibility of the maintenance department. **IMC** should be used to clean the ice machines as often as possible or at least during each scheduled maintenance check to insure proper operation and long equipment life. For more information on **IMC** Ice Machine Cleaner contact your local **ais** representative.
