

GRAFFITI SHIELD is a durable non-stick coating that prevents graffiti from sticking to all surfaces that are porous or non-porous. Lockers, brick walls, concrete, street signs, playground equipment are safe from markings. Permanent marker, paint, chewing gum, or decals will not adhere to this coating. **GRAFFITI SHIELD** is VOC compliant and has been tested in a variety of climates and shows no signs of corrosion by UV rays, acid rain, salt spray, or ozone. **GRAFFITI SHIELD** allows expansion or contraction once it is cured. It can be applied to any surface and has extreme chemical resistance which allows maximum protection.

DIRECTIONS FOR USE:

The surface is to be clean and free of foreign substance. Some porous surfaces may require duplicate coating. Shake product well before applying. Apply product at 40° F and above and as long as there is no moisture on surface. Always test the surface before continuing the entire application. One 20oz. can contains a net weight of 12oz. and covers approximately 30 square feet depending on the substrate. Allow 4 hours to cure in tranquil conditions.

Important: Flush nozzle of excess spray by holding can upside down and spraying after use to prevent clogging.

DANGER: Flammable. Contents under pressure. Do not use near fire or sparks. Do not puncture or incinerate container. Exposure to temperatures above 120 F may cause bursting. Never throw a can into fire or incinerator.

FIRST AID: Wash skin with soap and water and rinse immediately. Wash and flush eyes for 15 minutes. If irritation persists, call a physician. If swallowed, do not induce vomiting and call a physician.
