

COIL HD

Heavy Duty Acidic Coil Cleaner

This remarkable cleaner is designed to renovate neglected and oxidized coils, fins and filters. **COIL HD** will actually step-up the heat transfer in large or small air handling units from 40% to 80% depending on the degree of oxidation and grime. This product will remove dust, lint, smoke, grease, oxidation and pitting from HVAC coils without the need for high pressure sprayers. **COIL HD** is virtually odorless and safe to use in close, confined areas as well as hospitals, hotels, nursing homes, etc.

DIRECTIONS FOR USE:

Dilute **COIL HD** with 3 parts water. Spray directly onto fins and coils. Turn unit on and normal cycling will create condensation which will activate concentrate and keep coils clean and odor free. Rinsing with water is also highly recommended. For immediate cleaning, allow cleaner to set on surface five minutes then rinse with water.

INGREDIENTS	CAS NUMBER
ETHYLENE GLYCOL	
N-BUTYL ETHER	111-76-2
PHOSPHORIC ACID	7664-38-2

Additional Information

COIL HD Heavy Duty Coil Cleaner is the strongest, most powerful cleaner available for use on air conditioning and condenser coils. This acidic formula is especially effective for removing heavy scale build-up and oxidation from coils and other surfaces that are predominately aluminum. **COIL HD** easily removes corrosion and oxidation without scrubbing and leaves coils looking like new. This fast and easy solution to neglected or badly oxidized A/C coils takes only five minutes, which means that the ventilation system need not be shut down for a long period of time. For periodic cleaning and preventive programs, **COIL HD** may be diluted with up to 3 parts water, further reducing maintenance costs. **COIL HD** is one of many high performance products from American Industrial Supply Inc. For a demonstration of **COIL HD** contact your local **ais** representative.
