PRODUCT OF
AMERICAN INDUSTRIAL SUPPLY, INC.

Directions

Test Patch: Always prepare a test patch in an inconspicuous area prior to full application. EXP can effect floor finishes and project surfaces. Some sub-floors are moisture sensitive and may not be suitable for water rinse. **Mixing:** Do not dilute, product is packaged ready to use. **Preparation:** Remove all loose carpet foam and underpad. Expose all areas of adhesive to be removed. **Application: Carpet and Vinyl Adhesives:** Apply ENVIRO DECAL REMOVER to the area using a roller, mop or rag. Ensure that sufficient product has been applied to saturate the remaining underpad or glue. Repeat for stubborn areas. For linoleum or tile, pre-cut the surface into 2 inch squares to allow product to penetrate glue below. **Dwell Time:** Allow product to dwell up to 15 to30 minutes or until glue has softened. Black Tile Mastic: Pour product on surface and spread using a 36" wide bristle brooms. Let dwell 45 to 120 minutes. Agitate periodically to work in remover and test remover. Contact time is dependent on temperature, humidity, and thickness of mastic.
