

**LUSTRE** is a highly concentrated liquid designed for use in the modern steam cleaning and extractor type carpet cleaning equipment

### Super Concentrated - Biodegradable

Because it is in liquid form, it offers several advantages over the powder types:

- Instantly mixes and dissolves in water.
- Never settles out or clogs lines or valves.
- Incorporates grease cutting solvents.
- Easier to handle, measure, mix and store.

This formulation includes optical brighteners, water conditioners, and a true odor counteractant which helps to remove odors and leaves a refreshingly clean fragrance.

### DIRECTIONS FOR USE:

Add one ounce of cleaner per gallon of clean, hot water. You may also use this cleaner as a spot remover by diluting with 3 to 5 parts water and applying sparingly directly to carpet. Then blot up or shampoo in usual manner.

## Additional Information

**LUSTRE** is a highly concentrated, biodegradable carpet shampoo for use in extractor type cleaning machines. This advanced formula contains optical brighteners to make carpets look like new again. **LUSTRE** provides many unique benefits all of which save time and material costs plus increase performance and productivity. Other products require that you first use a "Traffic Lane" pre-treatment (usually mixed 6-8 ounces per gallon), then to shampoo they require a de-foamer in addition to the soap (1-2 ounces per gallon), plus a deodorizer is optional (1-4 ounces per gallon). All of these chemicals mixed with a conventional shampoo (4-6 ounces per gallon) add up to a great deal of expense, hassle, waste and storage area. As with all **AIS** products, **LUSTRE** is highly concentrated and only calls for **ONE OUNCE** per gallon of water. **LUSTRE** does not require the use of any pre-treatment plus the **de-foamer and deodorizer are already included in the formula** to save you time, expense, and to minimize storage. With everything you need already added, **LUSTRE** is the only chemical needed to properly steam clean carpets. No other product can match the performance or be more practical to use than **LUSTRE**. One product to buy, one product to store, one product to mix, one company to best handle your floor care needs. Consult your local **AIS** representative for information on our complete line of carpet and floor care products.
