**Diesel Fuel Tank Improver**

**Item Number: 5151**

For Professional Use Only

**Description:** This product is a multi-functional additive for diesel fuels that are used in turbine and internal combustion engines. It is used to maintain distillate fuels in a sludge-free stabilized condition. This eliminates a multitude of problems in the storage, transportation, and combustion of distillate (diesel) fuels. Fuel stability is becoming a pressing problem as the practice of blending fuels from different sources becomes more widespread. Blending certain distillates can accelerate fuel oil degradation, which is the depolymerization and breakdown of hydrocarbons. This results in sludge formation, color deterioration, and disagreeable odor.

**Performance Characteristics:** This product is an excellent multi-functional additive for diesel fuels used in turbine and internal combustion engines. It increases the fuel stability by providing better dispersion of heavy hydrocarbons, carbon, water, and other sludge and deposit forming substances. It improves the atomization and combustion of the oils, it also helps in preventing potential sludge forming reactions in either blended fuels or single stock distillate fuels. It will also help to disperse existing sludge or other deposits in fuel systems. This product contains active ingredients that are readily soluble in water to provide a nondeposit-forming protective film on metal surfaces in the fuel system to inhibit corrosion. This product is formulated to readily emulsify in water to provide the control that eliminates the degradation and disagreeable odors in oils during transportation and storage. It is ashless in that it contains no inorganics or metallics. It is compatible with most hydrocarbon fuel stocks and is nonextractable. This product provides its multi-functional benefits without harmful side effects.

**Additional Information**

**DANGER:** Combustible liquid. Contains petroleum distillates. Use only in a well ventilated area. Do not use near heat, sparks, open flame or other sources of ignition. Do not smoke in use area. Upon opening, pour entire contents into diesel tank. Harmful or fatal if swallowed. If swallowed, do not induce vomiting! Give large amounts of water. Call a physician immediately. Vapor harmful. Use with adequate ventilation. Avoid prolonged or repeated breathing of vapors. If overcome by fumes, remove victim to fresh air. Resuscitate if necessary. Get medical attention. **KEEPOUT OF REACH OF CHILDREN.**
