

SPA CONTROL
Concentrated Defoamer for Spas and Fountains

SPA CONTROL gives immediate foam knockdown in all types of spas and fountains. When used properly and consistently, this additive eliminates foam completely. **SPA CONTROL** is safe, fast acting and simple to use. Add **SPA CONTROL** directly to water as with other spa chemicals to eliminate and prevent the build-up of foam residue.

DIRECTIONS FOR USE:

Shake well before using. Add **SPA CONTROL** at a rate of 1 to 2 ounces per 500 gallons of water in spa, or as needed to eliminate and prevent the build-up of foam residues. Do not pour on walking surfaces as they may become slippery.

Contains no hazardous ingredients as listed in the following references: (1) CFR 29, 1910.1000, subpart Z, REV 01JUL88; (2) The Director's List of Hazardous Substances (CA); (3) Threshold Limit Values and Biological Exposure indices for 1989-1990 (ACGIH)

Additional Information

SPA CONTROL Defoamer for Spas and Fountains is a highly concentrated, biodegradable product that instantly eliminates foam build-up and residue. Many defoamers require that you add so much product that they will actually cloud the water in the spa or fountain. **SPA CONTROL** is very concentrated and will not cloud water, alter the pH or the chemical balance of the spa. Designed to work equally well in hot or cold water, **SPA CONTROL** is the ideal product for apartment complexes, hotels, athletic clubs, fitness clubs, etc., or at any facility that has spas, hot tubs, whirlpools, fountains or waterfalls. **SPA CONTROL** is earth friendly and non-hazardous making it the best choice for environmentally concerned and safety conscious companies. For more information contact your local **AIS** representative.
