

WENOL All Purpose Metal Polish

WENOL polishes and preserves all blank metal surfaces such as brass, silver, copper, chrome, aluminum, pewter, stainless steel and enamel. Not recommended for painted and plated metals or anodised aluminum. Use special care polishing plated metals. **WENOL** is very gentle to metal surfaces and gives a sparkling shine. Special ingredients create a water resistant coating which protects against rust and tarnish for weeks.

DIRECTIONS FOR USE:

Apply **WENOL** evenly to surface with a soft cloth. Polish vigorously, then buff to a shine. Can also be used on wet surfaces.

INGREDIENTS

GASOLINE
KEROSENE
COCO FATTY ACID DIETHANOL AMIDE
AMMONIUM OLEATE

CAS NUMBER

64742-88-7
8002-05-9
120-40-1
544-60-5

Additional Information

WENOL All Purpose Metal Polish is perhaps the most effective metal polish available today. This impressive product deeply cleans and removes tarnish better than many acidic cleaners and leaves a protective coating that lasts for weeks. What this means is that using **WENOL** will not only make your decorative metals look better but also will reduce the labor spent maintaining the appearance. A common use for this type of product are brass railings at building entrances. With conventional polishes this job must be done on a daily basis because once cleaned the surface begins to re-tarnish immediately. **WENOL** cleans faster and leaves a tarnish resistant coating so that cleaning can be done weekly instead of daily. This reduction in labor costs can be a tremendous savings at the end of the year. Contact your local **AIS** representative for a demonstration.
