

FAB-SPOT
All Fabric Spot Remover

FAB-SPOT Spot Remover is a convenient, ready-to-use product designed to be used on carpets, upholstery, clothing and a variety of fabrics. The handy pump spray container makes **FAB-SPOT** fast and easy to use. Use for removing spots or for laundry pre-spotting.

DIRECTIONS FOR USE:

Always try to remove stains while they are still fresh, as the longer they remain, the more difficult they are to remove. Never use spotter on fabrics that are not color fast. If you are not sure, test in a spot that will not show. When you have heavy tar or heavy grease, scrape off as much of the excess as possible with either a kitchen knife or a putty knife before spotting. Spray spotter liberally on the spot as well as on the brush or towel being used to rub the spot. Always plan to work from the outside of the stain toward the center. If not totally clean with the first application, repeat the process. Finish the job by blotting the area with a clean towel.
