

## CON-PATCH Concrete and Mortar Patch

**CON-PATCH** can be used to repair cracks in brick steps, cement blocks, mortar joints, stucco, driveways, sidewalks and foundations. Its features include crack resistance and excellent adhesion. **CON-PATCH** can be used inside or outside. Dries flexible and adheres to all concrete surfaces. Expands and contracts with heat and cold. Can be used in small expansion joints (up to 3/4").

### DIRECTIONS FOR USE:

- Cracks and joints must be clean and dry.
- Trim nozzle to desired bead size.
- Puncture membrane at inner base of nozzle.
- Use only when temperature is above 40° F.
- Clean up with soap and water.
- Keep from freezing.
- Do not apply when rain is imminent. Rain can damage **CON-PATCH** within 12 hours after application.

## Additional Information

**CON-PATCH** Ready to use Concrete and Mortar Patch is a specialized product designed to repair cracks and crevices up to 3/4" in concrete, brick, mortar and stucco. The most impressive feature of this product is its ability to stay flexible and to resist cracking even under severe climate changes. **CON-PATCH** expands and contracts as the temperature changes and maintains adhesion to insure a long lasting repair. **CON-PATCH** is the color of concrete when dry and can be used indoors or outdoors. Some of the most popular uses for this product are; cracks in concrete slabs or sidewalks that can become trip-hazards, the gap between pool edges and cool decks, small expansion joints between exterior walls and door frames (especially cement or stucco walls and steel doors), cracks in walls and foundations that would allow weeds or water to get through. **CON-PATCH** is fast and easy to use, no mixing or trowelling, and the convenient cartridges fit into any standard caulking gun. For a demonstration of **CON-PATCH** and information on all of our concrete repair products, contact your local **ais** representative.
