# Enviro Solidifier

**WastePaint Solidifier for all water-based paints stains and inks**

**ARE YOU AN ENVIRONMENTAL GOOD GUY ?**

1) Add to old paint    2) Stir or shake    3) Allow to solidify

## ENVIRO SOLIDIFIER

Become an environmental hero while saving money!

- ✍ Liquid paint is not accepted by most landfills. Convert it to a solid, and dispose of it as you would any garbage ... saving money in disposal costs while saving the environment!
  - ✍ Waste Paint Solidifier quickly turns any water-based latex paint to a solid allowing for curb-side disposal
  - ✍ Great for containing spills
  - ✍ Simply Add, Stir, and Dispose.
  - ✍ Works in minutes!!
  - ✍ One bag will harden up to 2/3 gal of latex paint
  - ✍ One pail will harden up to 107 gal of old latex paint
- Non-Toxic, Non-Regulated

### How It Works

**ENVIRO SOLIDIFIER** was developed from some of the same, super absorbent ingredients used in baby diapers. It is environmentally perfect and is very inexpensive. All states in the US (except CA and MN) permit water-based paints in a solid form to be disposed in the landfill. Always refer to the MSDS before using.

### Where Its Used

✍ Paint contractors for:

Hardening left over paint

Quickly containing job site spills

✍ Municipal "Household Hazardous Waste" Coordinator

Street Departments/Country/State Highway garage to solidify left over traffic marking paint

✍ Schools, Motels, and Hotels to solidify old paint

✍ Industry to

Solidify liquid, non-hazardous sludge

Harden water-borne waste
